DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 25-30 and 32, drawn to an apparatus and method for preparing a sample for PCR, classified in class 435, subclass 6 and 287.2.
- II. Claims 15-24 and 31, drawn to an apparatus and method for filtering and concentrating a sample, classified in class 92, subclass 78.

Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility in that it can be used to filter and concentrate a liquid sample as a preprocessing procedure for any chemical or biochemical experiment. The invention of Group II could be used to concentrate a product solution containing a desired cellular product or analyte. Furthermore, a sample can be applied to the absorbent material of the invention of Group I using a device other than that of Group II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1744

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
